Sat, Aug 31, 2019 at 12:26 PM

Dear Carl,
thanks for reminding me, and sorry you had to. The data are in the attached file, and here is a snippet from a latex file where I wrote some documentation for the data:

This file contains data used in
Aly, H.~Y., R.~G.~Grabowski, C.~Pasurka, and N.~Rangan (1990),
Technical, scale, and allocative efficiencies in U.~S.~banking: an empirical
investigation, *{it Review of Economics and Statistics}* 72, 211--218.

Number of DMUs: 322

Number of inputs: 3

Number of outputs: 5

Format(i3,2x,i8,11g15.7)

Variable list: obs no. (1--322), bank id,
\$X_1\$, \$X_2\$, \$X_3\$, \$P_1\$, \$P_2\$, \$P_3\$, \$Y_1\$, \$Y_2\$, \$Y_3\$, \$Y_4\$,
\$Y_5\$, branch-dummy.

Richard Grabowski sent me the data many years ago and gave me permission to use it. I have used it to give illustrative examples in several papers, and always cite your paper when I do. So, I am happy to be able to return the favor, if not to Richard but to his coauthor!

Best wishes,
Paul
